excellence in dependable automation

CONFIDENTIAL

## COMPUTEX 2026

**COMPUTEX** is a computer expo held annually in Taipei, Taiwan, and it is one of the largest computer and technology trade shows in the world.

**COMPUTEX 2026** opened on the 2<sup>nd</sup> of June and ran until the 5<sup>th</sup>. It was themed "AI Together," and focused on applications in AI infrastructure, robotics, smart mobility, and next-generation technologies.

exida Development is proud to announce that our CEO **Carlo Donzella** not only attended the expo but was one of the industry representatives who spoke at the AI × Smart Mobility forum held by TADA (The Taiwan Advanced Automotive Technology Development Association).

Carlo Donzella held a presentation titled: Global Regulatory and Certification Trends: Key Market Entry Challenges for Intelligent Vehicles.

**exida** – Support people in new safety technology

**CONFIDENTIAL**

The presentation went over the work exida Development has carried out across three different European R&D Horizon Projects, SafeXplain (which ended September 2025), Edge-AI Trust and SHAS-AI, as well as III/FAiTH's collaboration with exida Development and BSC on improving our V&V model (a result from SafeXplain).

**The context**

In the last four years, EXIDA has been involved in three European R&D Horizon Projects:

- 1. SAFEXPLAIN: SAFE AND EXPLAINABLE CRITICAL EMBEDDED SYSTEMS BASED ON AI;** (start 10/2022, end 09/2025); <https://safexplain.eu/> -> some results from this project have been already presented at **INNOVEX 2014**
- 2. EdgeAI-Trust: Decentralized Edge Intelligence: Advancing Trust, Safety, and Sustainability in Europe;** (start 01/2024, end 04/2027); <https://www.edgeai-trust.eu/>
- 3. SHASAI: Secure Hardware and Software for AI systems;** (start 11/2025, end 04/2029); <https://shasai.eu/>

The common denominator for all EXIDA participations has always been to further advance **tools and methodologies for Safety and Security compliance of Autonomous Vehicles.**

The forum took place at the SMART MOBILITY PAVILION and was titled “AI × Smart Mobility Cross-Domain Integration Driving the Global Deployment of Smart Vehicles” and brought together experts from domestic and international automotive electronics, smart mobility, international verification, and AI applications to discuss the transformation trends of the smart vehicle industry and global market deployment strategies in the AI era.

Furthermore, the event was featured in an article from the Taiwanese Commercial Times: <https://www.ctee.com.tw/news/20260602702146-431202>
